

F.I.L.E. Tracker

Fully-Integrated Live Event Tracker

SEE THE STATUS OF ALL YOUR
TRANSACTIONAL DOCUMENTS
IN REAL TIME

Now Available Within

Starting at the beginning of Q3, all clients who sign up with or already use our intelliStatement® solution will have access to the brand new F.I.L.E. Tracker feature.

This feature gives each user an instant view of what is happening to their file, in real-time, right from the table of the solution.

Clicking on one of the F.I.L.E. Tracker's from within its own column will open a more detailed view with an explanation of what stage your transactional documents are undertaking. eCorrect users will have the opportunity to enjoy an even more detailed view from within this window that indicates which files are going through the eApprove phase. Our goal is to make managing your transactional documents a seamless experience.

intelliStatement® is our Automated Revenue Cycle Enhancement solution geared toward your self-pay and "balance after insurance" accounts. By automating your groups' best practices, you can be assured that your in-house collection efforts are being executed in a highly productive manner with a minimal amount of overhead. Consider intelliStatement® as an alternative to costly pre-collection or early out programs.

We turn ordinary documents into effective patient communication by:

- Applying business rules to individualize and personalize documents.
- Creating innovative design formats that enhance payment.
- Providing web-based services that improve customer service and accelerate cash flow.
- Providing custom backends included in your Statement set. Providing the option of bilingual billing.
